[StackOverflow](#) / [GitHub](#) / [GitLab](#)

Software developer with experience in complex projects and distributed software development teams. Hands-on Python and JavaScript programmer. Fond of skiing and painting. Russia, Saint-Petersburg, UTC +3.

Projects

2018. [Cryptocurrency trading bot](#) I developed a unified API for trading exchanges, a trades dashboard and algorithms. Async Event-Driven architecture; PyTest unit and integration tests; TimescaleDB, Redis; Drone CI, Docker, Sentry.

2017. [Streaming media platform](#) I worked mostly on video transcoding services, but also on REST APIs and admin dashboard. Sync/Async REST microservices; MongoDB, Redis, RabbitMQ; Gitlab CI, Docker, Sentry; Yandextank; ffmpeg to handle media containers.

2016. [Stroyprombeton](#) I worked on online stores [Shopelectro](#) and [Stroyprombeton](#) based on our own e-commerce Django packages. Python, JavaScript ES6; Django, jQuery; Automated Selenium integration tests; PostgreSQL, Redis, RabbitMQ; Drone CI, Docker, Sentry.

2016. [Shopelectro](#) I worked on online stores [Shopelectro](#) and [Stroyprombeton](#) based on our own e-commerce Django packages. Python, JavaScript ES6; Django, jQuery; Automated Selenium integration tests; PostgreSQL, Redis, RabbitMQ; Drone CI, Docker, Sentry.

Career

june 2016 - present: Python developer @ [Fidals](#)

Fidals is a distributed software development team. We develop back-end services in Python.
